PEOPLE, PRINTED WITH LOVE

PARTNER PROGRAM · FOR ULTRASOUND CLINICS

From ultrasound to heirloom.

A hand-finished 3D-printed sculpture of your client's baby, created directly from the scans you already perform.

FETAL KEEPSAKE COLLECTION · VOL. 1

THE KEEPSAKE

The first portrait, in three dimensions.

Every sculpture begins with the 3D/5D images captured during a routine elective scan. The standard JPEG files your machine already produces are all we need. Our artists digitally reconstruct the baby's face and posture, clean the scan noise by hand, and print the piece in a matte, skin-tone material, nestled in a sculpted womb shell.

The result is not a toy and not a render: it is a true-to-scan sculpture parents can hold months before they meet their baby.

Hand-finished in Canada. Each piece is one of one.

FROM SCAN PHOTO TO SCULPTURE:
SAME SESSION, SAME BABY

PALM-SIZED CLASSIC: ACTUAL
PRODUCT, UNRETOUCHED

THE COLLECTION

Three ways to remember.

ECONOMY

Keepsake

A single-colour print made directly from the scan. An accessible first keepsake: perfect as a scan-package add-on, gender reveals, and baby showers.

CLASSIC

Signature Sculpture

High-detail resin print with refined facial features, hand-finished surface, and a display base. The centerpiece of the nursery shelf.

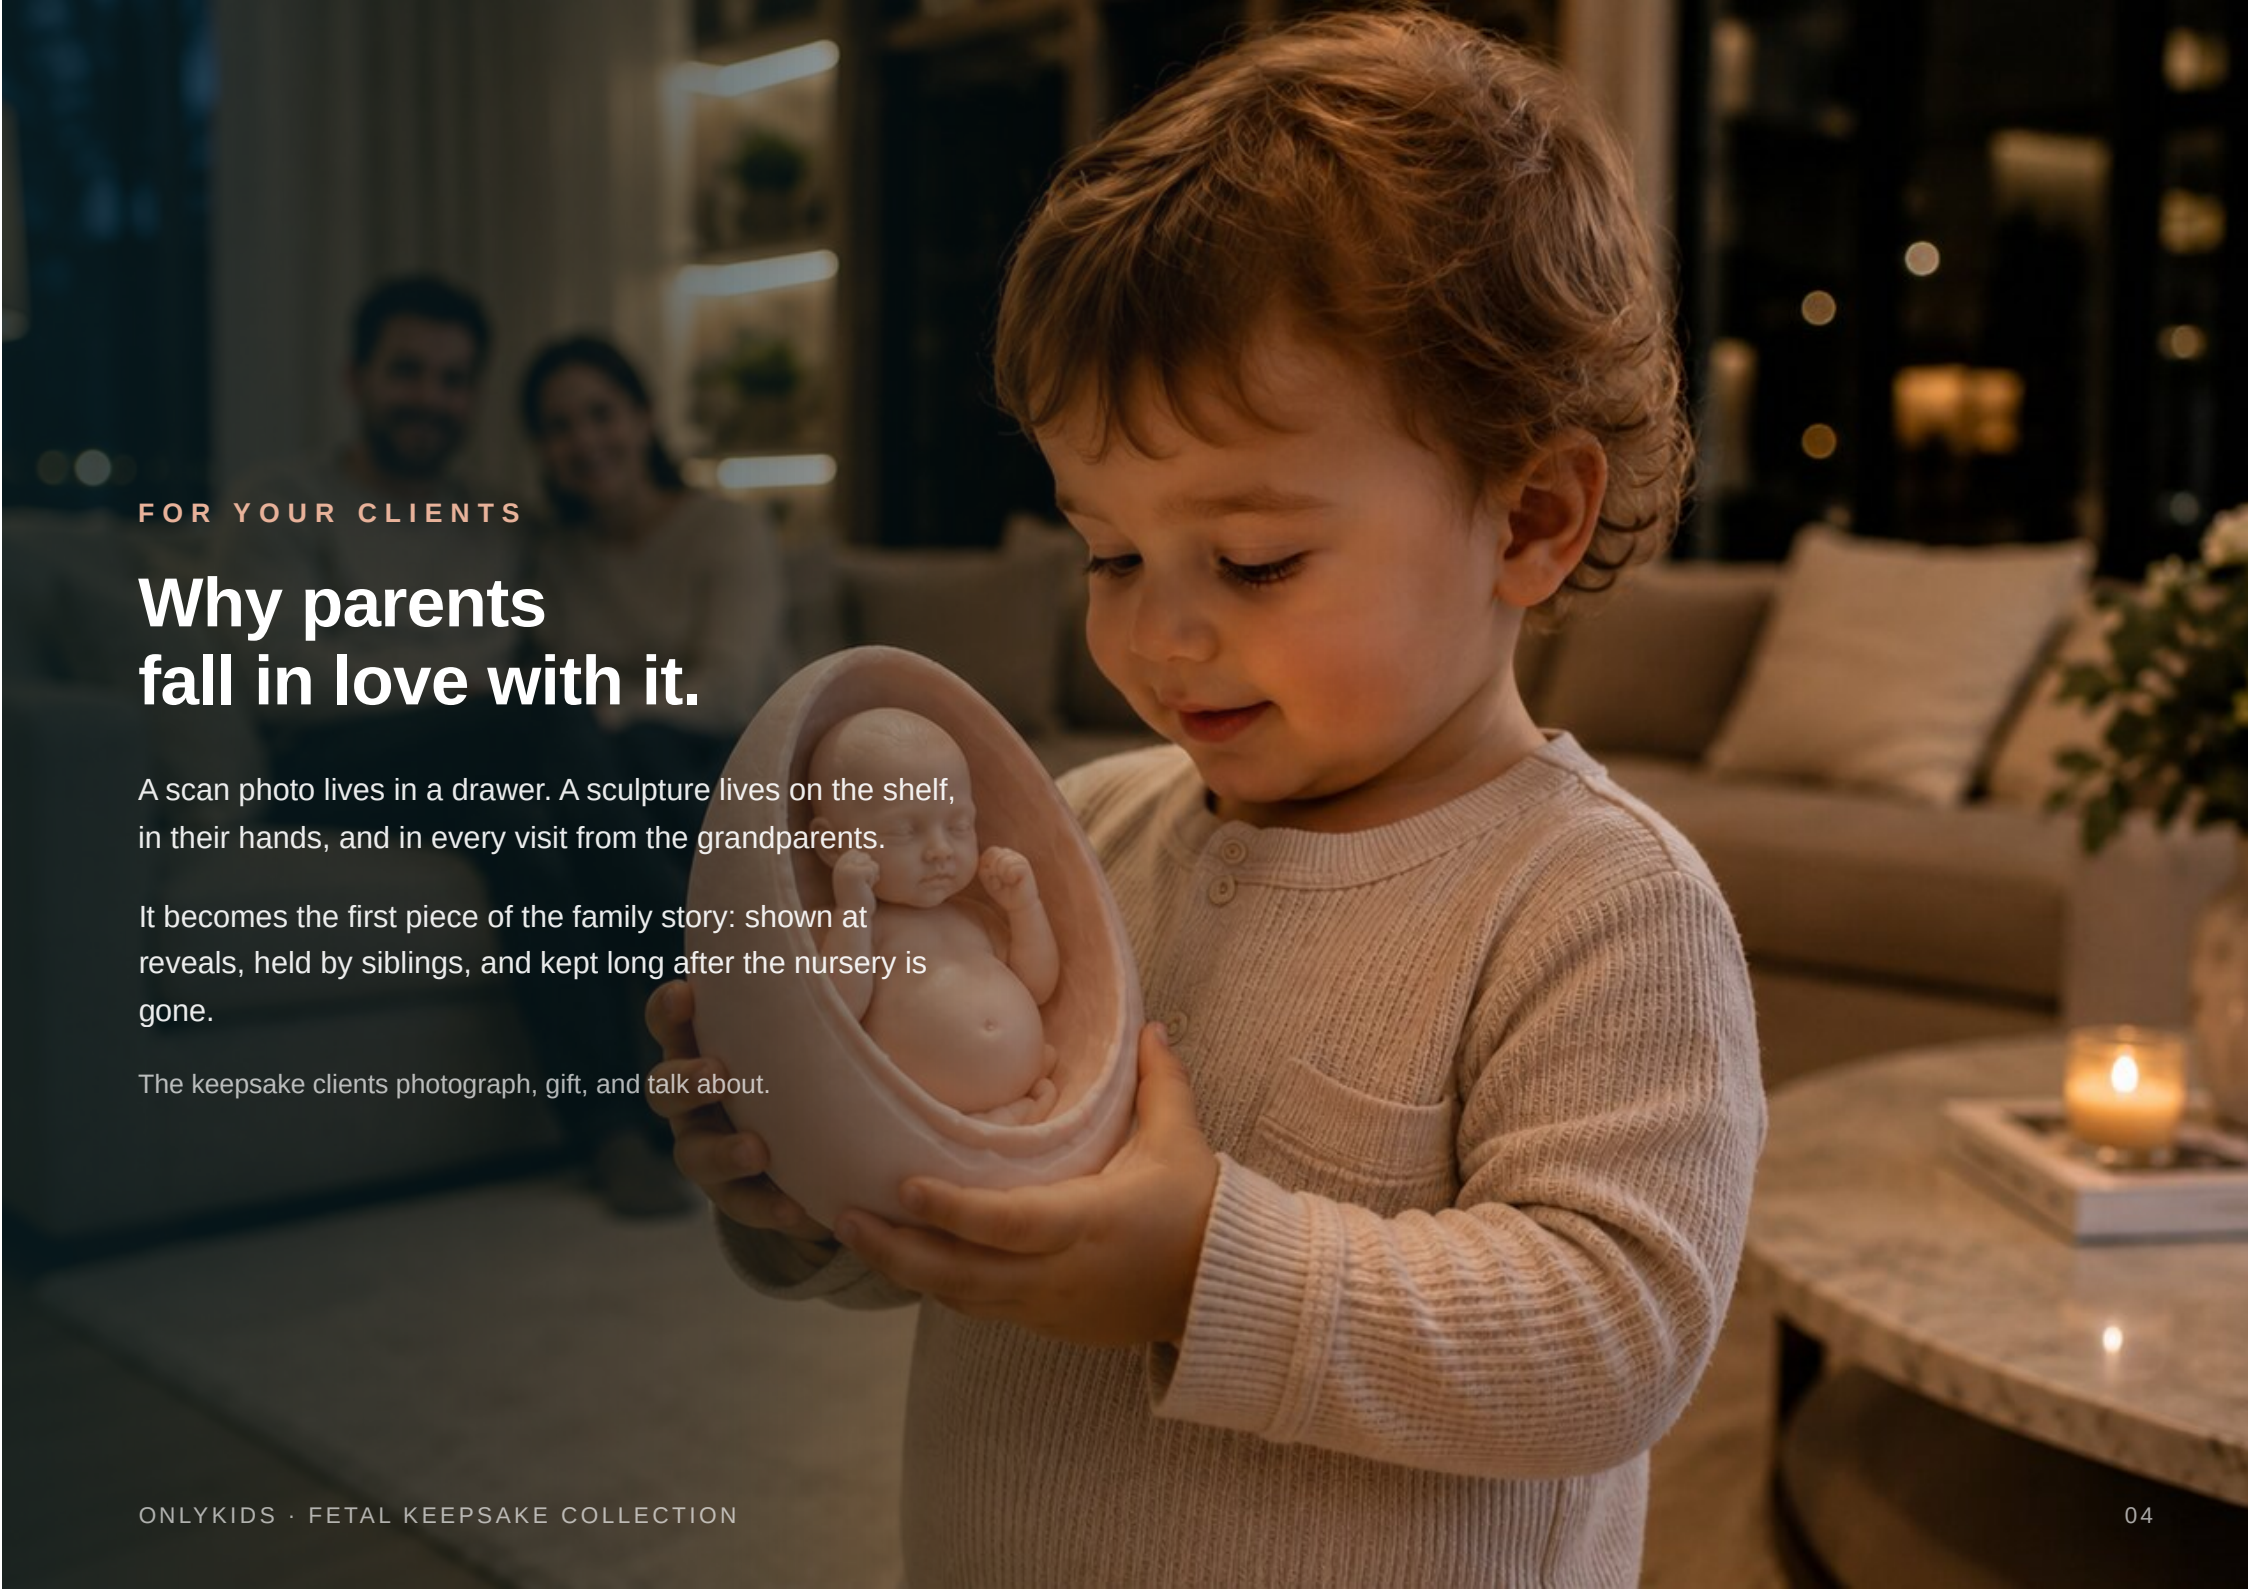

PREMIUM

Full-Colour Edition

Printed on Stratasys PolyJet in full colour: lifelike skin tones and museum-grade realism that standard prints can't match. Only a few studios in Canada offer this finish.

Every sculpture matches the gestational week of the scan. Best scan windows: full-body sculptures from weeks 13–20 · facial-detail sculptures from weeks 26–32. Partner pricing available on request.

A young child with curly hair, wearing a light-colored sweater, is holding a white, oval-shaped keepsake sculpture of a fetus. The child is looking down at the sculpture with a gentle expression. In the background, a man and a woman are sitting on a sofa, looking towards the camera. The room is dimly lit with warm, ambient lighting, including a lit candle on a table to the right.

FOR YOUR CLIENTS

Why parents fall in love with it.

A scan photo lives in a drawer. A sculpture lives on the shelf, in their hands, and in every visit from the grandparents.

It becomes the first piece of the family story: shown at reveals, held by siblings, and kept long after the nursery is gone.

The keepsake clients photograph, gift, and talk about.

You scan. We sculpt. Your clients fall in love.

1

Scan as usual

No new equipment, no extra session time. The keepsake is made from the 3D/5D JPEG images you already capture.

2

Export the JPEGs

Save the 3D/5D images from your machine, the same files you already print for clients.

3

Send them to us

Select one to three photos and send them through our secure upload link. Our artists reconstruct and sculpt the model, and after your approval we print it with state-of-the-art 3D printers. Every file is handled privately and can be completely deleted on request.

4

Delivery in 7–10 days

Client pickup at your clinic, or direct shipping to their door (postage at cost). Gift-ready packaging.

Approval policy: every order includes a digital preview before printing. If the reconstructed model is not approved by the client after two rounds of revisions, the order can be cancelled for a small handling fee. Minimal risk for your clinic, honest results for your clients.

WHY CLINICS PARTNER WITH US

A new revenue line. Zero investment.

- **Revenue without overhead**

You sell the keepsake alongside your packages; we handle production, packaging, and fulfilment. Partner margin on every order.

- **Stand out**

Stuffed animals with heartbeat recordings are in every clinic. A sculpture of their own baby is not. Give your clients something no photo package can offer, made in Canada.

- **In-clinic display set**

Sample sculptures offered to partners at a special display price. The product sells itself the moment clients hold one.

- **Honest expectations**

Every sculpture pictured is a real printed product, not an AI render. What your clients see is exactly what they receive.

GESTATIONAL-STAGE DISPLAY SET IN A PARTNER SCAN ROOM
